REISSUE APPLICATION DECLARATION AND POWER OF ATTORNEY

To the Assistant Commissioner for Patents:

Sir:

I, Tai-Her Yang, a citizen of the Taiwan, R.O.C. and resident of Dzan-Hwa, Taiwan, declare that I believe I am the original, first, and sole inventor of the subject matter that is described and claimed in the aforesaid letter patent and in the foregoing specification, and for which invention I solicit a reissue patent.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims.

I acknowledge the duty to disclose information that is material to the examination of this application, namely, the information where there is a substantial likelihood that a reasonable

examiner would consider it important in deciding whether to allow the application to issue as a patent.

In compliance with this duty, there is attached an information disclosure statement in accordance with 37 CFR 1.98.

PRIORITY CLAIM

I hereby claim foreign priority benefits under Title 35, United States Code, §119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

No such applications have been filed.

**STATEMENT OF INOPERATIVENESS OR INVALIDITY OR
INVALIDITY OF ORIGINAL PATENT**
(37 CFR 1.175)

That I verily believe the original patent to be partly inoperative or invalid by reason of a defective specification or drawing (37 CFR 1.175(a)(1)).

That the error listed above, which is being corrected, up to the time of the filing of this reissue declaration, arose without any deceptive intention on the part of the application. (37 C.F.R. §1.171(a)(2)).

The statement below specifies the reasons relied upon (37 C.F.R. §1.175(a)(5)), and why the original patent is believed to be wholly or partly inoperative or invalid (37 C.F.R. § 1.175(a)(1)):

The original patent is believed to be partly inoperative or invalid because the drawings in the patent fail to show clutch CL104 and brake B102, described in the specification and recited in claims 6 and 7 of the patent.

Although the remaining elements recited in the claims of the original patent are shown in the drawings, the drawings were actually intended to be submitted in copending application Ser. No. 08/317,633 (now U.S. Patent No. 5,562,566), filed October 3, 1994, the same day as the present application, while the drawings of copending application Ser. No. 08/317,633 were intended to be submitted in the present patent.

In other words, the drawings of the present patent and U.S. Patent No. 5,562,566 were interchanged. Although the drawings are substantially similar, the differences are sufficient to render the original patent wholly or partly inoperative.
